

WESTINGHOUSE AND THE CAROLINAS

Working Together to Accomplish Great Things

WESTINGHOUSE ELECTRIC COMPANY LLC

Westinghouse Electric Company has a long-standing track record for providing the safest, simplest, most advanced and cost-effective technologies for the commercial nuclear power industry. We have several manufacturing and service facilities in North and South Carolina and are committed to serving and supporting the 12 existing nuclear units in the Carolinas.

Our newest design, the Westinghouse **AP1000** nuclear power plant, is the most advanced of its kind currently available in the global marketplace. It is the technology of choice for 14 new plants in the United States, four of which are under construction, two in South Carolina and two in Georgia. Building additional advanced nuclear plants will enhance our energy security and provide future generations with safe, clean and reliable electricity.
