Westinghouse and Southeast Utilities,

Accomplishing Great Things Together

Westinghouse is committed to serving and supporting the region's 29 existing nuclear units. We are working with Southern Nuclear, Progress Energy and South Carolina Electric & Gas to build 6 units of our newest design, the Westinghouse **AP1000** nuclear power plant, the most advanced of its kind currently available in the global marketplace. Eight additional **AP1000** units are under negotiation for the region.

Each new unit creates between 1,400 and 1,800 construction jobs and up to 700 long-term, permanent jobs, helping to grow the economy of the Southeastern United States.
